FOR IMMEDIATE RELEASE

**InfoZen Strengthens Market Position with 95 Percent
Increase in Revenue**
Q1 2007 Sees New Contracts Totaling More Than \$17 Million

Rockville, MD—InfoZen, Inc., a leading provider of consulting, engineering and risk assessment/management solutions, has experienced significant success in the past few months signing six new contracts totaling approximately \$20 million.

In support of the rapid growth and success, InfoZen has increased its employee base by 35 percent in Q1 2007, including the hires of Glenn Gargan and Tom Basile, two senior executives for business operations and sales & marketing respectively.

InfoZen was most recently awarded a 5-year \$10 million task order to provide a major law enforcement agency with technical and solutions analysis services and an Indefinite Delivery/Indefinite Quantity (IDIQ) contract to provide Professional and Administrative Services for the Customs and Border Protection (CBP) office of the Department of Homeland Security.

Additional contract wins in the last quarter include three new prime contracts worth a total of more than \$6 million. These contracts include:

- The DoD Defense Travel Management Office (DTMO) contract to provide development support for their new Commercial Travel Information Management (CTIM) System.
- The expansion of InfoZen's strategic work with the Nuclear Regulatory Commission through a new contract to support the development of a Knowledge Management System to review New Reactor Applications.
- A contract with the United States Department of Housing and Urban Development to provide Adaptive Maintenance and Operations support for their Online Property Integrated Information Suite (OPIIS) Data Mart.

“We are excited to be growing at such an impressive rate and our dedication to meeting customers' needs speaks to the success that we are achieving in the government market,” said Raj Ananthanpillai, chief executive officer at InfoZen. “In just the last six months, we have penetrated four new agencies and deepened our footprint in several additional agencies positioning InfoZen for continued growth and success.”

This momentum builds upon InfoZen's 2006 success which included increased revenues of nearly 90 percent due to several major contract wins including: a renewed contract

with GSA's Office of Citizen Services to continue providing support of the USAGov.gov portal; a contract with the Department of Energy to provide management, regulatory and licensing consulting to DoE's executive management; and its first contract with the Department of Defense.

About InfoZen, Inc.

Founded in 1995, InfoZen (www.infozen.com) is a leading provider of transformational and strategic services and management, consulting and engineering services to government agencies, corporations and associations. Among its services, the company provides strategic planning, architecture design, management and support of mission-critical IT systems, and risk assessment/management solutions. InfoZen's major government customers now include the Department of Homeland Security, Nuclear Regulatory Commission, Department of Agriculture, General Services Administration, Department of Health and Human Services, Department of Housing and Urban Development and U.S. House of Representatives. InfoZen has been involved in all facets of the build out of FirstGov.gov, the U.S. government's official portal. The company is a recognized leader in risk-screening and credentialing solutions; it delivers eBusiness and infrastructure solutions for portal and content management; and it helps federal agencies design enterprise architectures and win budget support for new IT projects. InfoZen is headquartered in Rockville, Md.
